<p>TACCLE-Graham Attwell 2009 This book is written for classroom teachers who want to know more about e-learning and who would like to experiment with designing e-learning material to use in their own classrooms. It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too. The other group we had in mind were those of you still undertaking initial teacher training. Although there are some exemplary courses, a depressing number of trainee teachers continue to arrive in the classroom having barely heard the words ‘e-learning’, still less have hands on experience of it.</p>
<p>The Fox and the Stork- 2012-12-01 This book is suitable for children age 4 and above. “The Fox and the Stork” is a story about a stork that goes to a fox’s house for dinner. The fox decides to make fun of a stork by treating it to a plate of soup. The stork is unable to drink the soup and leaves the fox’s house hungry. The stork decides to teach the fox a lesson. The next day when the fox goes to the stork’s house for dinner, the stork treats the fox to a tall jar of soup. The fox goes home hungry and realises its mistake.</p>

<p>Eternal War - Armies of Saints-Livio Gambarini 2015-07-26 In 13th century Florence, the war between the Guelphs and Ghibellines is destroying entire families. Every corner of Tuscany has been drawn into the conflict, but little do the two sides realise their war is but a pale reflection of a battle between the mysterious inhabitants of the spirit world, lasting a thousand years. The spirit that guides the Cavalcanti family, Kabal, uses every any means at his disposal to make sure his family is not torn to shreds and eventually comes out on top. The true ace up his sleeve is the new head of his family, the warrior and poet Guido Cavalcanti. Guido is driven to seek an impossible peace as he strives to save his city and marry the girl he loves. He is helped by a young, exceptionally shy poet known as Dante Alighieri... It is a story of war, betrayal, intrigue and magic that is woven skilfully together to create a wondrous combination of historical accuracy and the fantastic world that lies behind human endeavour. “The Eternal War – Armies of Saints” is an innovative historical fantasy set against the backdrop of the Florence of the Divine Comedy. It has already conquered Italy and now, with the English translation, it is set to take the world.</p>
<p>The Emotional Load-Emma 2020-08-18 The author of The Mental Load returns with more "visual essays which are transformative agents of change." After the success of The Mental Load, Emma continues in her new book to tangle with issues pertinent to women's experiences, from consent to the "power of love," from the care and attentiveness that women place on others' wellbeing and social cohesion, and how it constitutes another burden on women, to contraception, to the true nature of gallantry, from the culture of rape to diets, from safety in public spaces to retirement, along with social issues such as police violence, women's rights, and green capitalism. And, once more, she hits the mark.</p>
<p>Endothelins in Biology and Medicine-John P. Huggins 1996-12-23 Endothelin-1 (ET-1), a peptide discovered in 1988, is one of the most potent contractors of vascular smooth muscle. Since their discovery, ETs have generated enormous interest in the scientific and pharmaceutical communities, prompting extensive research. This book addresses the latest findings regarding ETs-how they function, their effects, and characteristics. Divided into five sections, the book covers: endothelin receptors, endothelin synthesis and degradatation, endothelin pathophysiology, ligand structure and activity relationships, and clinical studies. Pharmacologists, toxicologists, and pharmaceutical researchers will all benefit from this thorough review of current findings and future directions in ET research.</p>

<p>Model of the Response Function of CUORE Bolometers-Marco Vignati 2011-04-29 Large mass bolometers are used in particle physics experiments to search for rare processes, like neutrinoless double beta decay and dark matter interactions. In the next years the CUORE experiment (a 1 Ton detector composed by 1000 crystals of TeO2 operated as bolometers in a large cryostat at 10mK) will be the particle physics experiment with the highest chance of discovering the Majorana neutrino, a long standing and yet fundamental question of particle physics. The study presented in this book was performed on the bolometers of the CUORE experiment. The response function of these detectors is not linear in the energy range of interest, and it changes with the operating temperature, worsening the performances. The nonlinearity appeared to be dominated by the thermistor and the biasing circuit used to read the bolometer, and was modeled using few measurable parameters. A method to obtain a linear response is the result of this work. It allows a great improvement of the detector operation and data analysis. With a foreword by Fernando Ferroni.</p>
<p>Compasito-Nancy Flowers 2007-01-01 Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what ‘Compasito manual on human rights education for children’ is for.‘Compasito’ is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence.The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.</p>

<p>Timothy Top Vol. 1-Gud 2018-10 Timothy Top is a grade school kid going through a hardtime. His parents are constantly quarreling, and he’s feeling like an outsideramong his classmates. His fascination with nature and superheroes makes for anunusual combination that few of his peers can relate to. But when a crookedbusinessman moves into the neighborhood with plans to “reinvent the localpark” into a concrete monstrosity devoid of nature and life, Timothy setsout on a mission to save a famous tree from the bulldozers. Being just a kid, hedoesn’t know how he’ll be able to go about this, until one night he discoversthat he’s been given the power of a magical green thumb that can heal and growplant life! He’s a superhero! But will he be able to use this power to save thepark or the relationship between his parents? Asimple tale but with many layers, this first volume supports respect for theenvironment, as well as dealing with bullies, quarreling parents, and schoolexpectations. Future volumes tiptoe into other topics such as discrimination,forgiveness, and commitment.</p>

<p>The Fundamentals of Drawing-Barrington Barber 2005-01-10 Anyone with a little persistence and the desire can learn to draw well - this is the starting point for The Fundamentals of Drawing, a practical and comprehensive course for students of all abilities. Opportunities for practice and improvement are offered across a wide spectrum of subjects - still life, plants, landscapes, animals, figure drawing and portraiture - and supported by demonstrations of a broad range of skills and techniques, including perspective and composition. The methods used in The Fundamentals of Drawing have been practised through the centuries by art students and professional artists. They are time-honoured and proven. Barrington Barber brings his invaluable expertise as a working artist and teacher to the task of showing you how to use them effectively to create successful drawings. No matter what your level of expertise, you will find his clear approach encouraging and his way of teaching inspirational.</p>
<p>The Graphic Novel-Jan Baetens 2001 The essays collected in this volume were first presented at the international and interdisciplinary conference on the Graphic Novel hosted by the Institute for Cultural Studies (University of Leuven) in 2000.The issues discusses by the conference are twofold. Firstly, that of trauma representation, an issue escaping by definition from any imaginable specific field. Secondly, that of a wide range of topics concerning the concept of “visual narrative,” an issue which can only be studied by comparing as many media and practices as possible.The essays of this volume are grouped here in two major parts, their focus depending on either a more general topic or on a very specific graphic author. The first part of the book, “Violence and trauma in the Graphic Novel”, opens with a certain number of reflections on the representation of violence in literary and visual graphic novels, and continues with a whole set of close readings of graphic novels by Art Spiegelman (Maus I and II) and Jacques Tardi (whose masterwork "C'?'tait la guerre des tranch'es" is still waiting for its complete English translation). The second part of the book presents in the first place a survey of the current graphic novel production, and insists sharply on the great diversity of the range in the various 'continental' traditions (for instance underground 'comix', and feminist comics, high-art graphic novels, critical superheroes-fiction) whose separation is nowadays increasingly difficult to maintain. It continues and ends with a set of theoretical interventions where not only the reciprocal influences of national and international traditions, but also those between genres and media are strongly forwarded, the emphasis being here mainly on problems concerning ways of looking and positions of spectatorship.</p>

<p>Tentacles at My Throat Tentacles at My Throat-Zerocalcare 2018-07-18 Three friends, their schoolgrounds, a secret. And fifteen years later, the discovery that they all thought there was only one secret, but each had their own. And there was one more, bigger than the others, that none were aware of. This is Zerocalcare's second graphic novel, the one that made him stand out as an intelligent, delicate, merciless narrator when it comes to describing his own weaknesses, which may be everyone's. A complete story in three parts at different times in the coming of age of young Calcare; three moments that have in common the all-too-familiar feeling of having tentacles at the throat.</p>
<p>Big Questions-Anders Nilsen 2011-08-16 A New York Times Notable Book of 2011, included on Amazon.com, Publishers Weekly, and NPR'S Best Comics lists A haunting postmodern fable, Big Questions is the magnum opus of Anders Nilsen, one of the brightest and most talented young cartoonists working today. This beautiful minimalist story, collected here for the first time, is the culmination of ten years and more than six hundred pages of work that details the metaphysical quandaries of the occupants of an endless plain, existing somewhere</p>

between a dream and a Russian steppe. A downed plane is thought to be a bird and the unexploded bomb that came from it is mistaken for a giant egg by the group of birds whose lives the story follows. The indifferent, stranded pilot is of great interest to the birds—some doggedly seek his approval, while others do quite the opposite, leading to tensions in the group. Nilsen seamlessly moves from humor to heartbreak. His distinctive, detailed line work is paired with plentiful white space and large, often frameless panels, conveying an ineffable sense of vulnerability and openness. *Big Questions* has roots in classic fables—the birds and snakes have more to say than their human counterparts, and there are hints of the hero's journey, but here the easy moral that closes most fables is left open and ambiguous. Rather than lending its world meaning, Nilsen's parable lets the questions wander where they will.

Artemisia-Nathalie Ferlut 2021-07-23 The English-language edition of Nathalie Ferlut and Tamia Baudouin's stunning biography of Artemisia Gentileschi, the trailblazing Italian baroque painter, originally published in French. This full-color graphic novel recounts the remarkable story of Artemisia, whose life story is told through the lens of Artemisia's daughter as she questions her mother about their family history. The ensuing tale spans most of Gentileschi's life, beginning with her childhood in Rome in her father's painting studio, to the sexual abuse she experienced at the hands of a tutor and the arduous trial that followed, as well as the highlights of her prolific career in which she received commissions from clients as powerful as the Medici and the English royal family and became the first woman admitted to the prestigious Academy of Arts in Florence.

The Playboy-Chester Brown 1992-12 D&Q's first ever graphic novel, published in 1992, this is an excellent companion to *I Never Liked You*. Stark and expressionistic, this is Chester Brown's frank and unsettling account of first his adolescent and then adult relationship with pornography. It begins in 1975 with an abandoned copy of *Playboy*.

Little Vampire-Joann Sfar 2008-04-29 Living in a house filled with grown-up ghouls and monsters, Little Vampire is so lonely that he's even willing to go to school if that's what it takes to find friends. Unfortunately, school seems to be filled with children who are still alive. . . . Little Vampire finds friendship with a boy named Michael, and they embark on adventures in the three stories in this collection. Included in this book are *Little Vampire Goes to School* (a New York Times Bestseller), *Little Vampire Does Kung Fu*, and *Little Vampire and the Society of Canine Defenders* (now published in the United States for the first time). Insightful and inventive, Joann Sfar brings Little Vampire and Michael's fantastical world to young readers in stories that both feed the imagination and resonate with emotional truth.

Dimensions of Creativity-Margaret A. Boden 1996 *Dimensions of Creativity* brings together original articles that draw on a range of disciplines—from the history and sociology of science, psychology, philosophy, and artificial intelligence—to ask how creative ideas arise, and whether creativity can be objectively defined and measured. *Dimensions of Creativity* brings together original articles that draw on a range of disciplines—from the history and sociology of science, psychology, philosophy, and artificial intelligence—to ask how creative ideas arise, and whether creativity can be objectively defined and measured. Margaret Boden and her colleagues Simon Schaffer, Gerd Gigerenzer, David N. Perkins, Howard Gardner, Colin Martindale, and Hans J. Eysenck demonstrate that creativity requires not only challenging new ideas but their acceptance by some relevant social group. Although some new ideas can arise as novel associations, others are generated by exploiting structural features of an existing conceptual space. Strong motivations often drive the creators and those who evaluate and perpetuate their work. The seven essays—although very different—are complementary. The book can serve as an up-to-date introduction to the study of creativity in various disciplines. The many references provide a way into the relevant literature. A Bradford Book

Art Comic-Matthew Thurber 2021-07-07 A raucous skewering of the art world as told by a master of absurdity Matthew Thurber's *Art Comic* is a blunt and hilarious assault on the swirling hot mess that is the art world. From sycophantic fans to duplicitous gallerists, fatuous patrons to self-aggrandizing art stars, he lampoons each and every facet of the eminently ridiculous industry of truth and beauty. Follow Cupcake, the Matthew Barney obsessive; Epiphany née Tiffany Clydesdale, the divinely inspired performance artist; Ivanhoe, a modern knight in search of artistic vengeance, and his squire, Turnbuckle. Each artist is more ridiculous than the last, yet they are tested and transformed by the even more absurd machinations of Thurber's fantastical art world. Can the Free Little Pigs destroy this blighted system? Will "The Group" continue its indirect assassination of promising young artists? Can artistic integrity exist in this world amid the capitalist co-opting, petty rivalries, otherworldly portals, heavenly interventions, and murders at sea? *Art Comic* is brimming with references and cameos, outsize personalities and shuddering nonsense—Robert Rauschenberg smashes a beer bottle, Francesca Woodman, a wineglass. In the center of it all, Thurber's twisted drawings and laugh-out-loud dialogue convey a complicated picture of an industry at the intersection of fantasy and reality. Part scathing condemnation, part irreverent appreciation, Thurber's comics skewer the art world in a way only an art lover can.

The Essential Dykes to Watch Out for-Alison Bechdel 2008 Brings together a new collection of cartoons recounting the lives and loves of a diverse group of lesbian friends.
