First published in 1982 to international acclaim, the Dictionary of Newfoundland English introduced the world to an incredibly rich dialect with deep roots in Ireland and the English West Country.

From the author of Yacht Designing and Planning and Boatbuilding: the definitive history and survey of the great classic American small sailing craft.

Part anthropological history, part informed critique, Encounters examines the relations.
between the people of southeastern Labrador and the many visitors who have come to fish, heal the sick, and extract the region's resources. John Kennedy presents the latest archaeological, genealogical, and ethno-historical research that changes scholarly understandings of southeastern Labrador. Departing from the conventional view that coastal Labrador has distinct Inuit and non-Inuit regions, he argues that the coast should be viewed as a continuum of "Inuitness." Encounters unravels the social implications of the region's complex mercantile fishery, describes how twentieth-century military and resource development have impacted Labrador's seasonal economy, and suggests that Newfoundland continues to use Labrador as a colony. Kennedy uses field research he conducted in 2013 to describe the origins, current economies, and future challenges of the region's tiny villages. Although he is a strong supporter of Aboriginal land claims, Kennedy explores the impact of identity politics in the region, showing how land claims based solely on geography can unintentionally create inequities. Drawing on decades of field and archival research, Kennedy demonstrates how Aboriginal politics are transforming society in southeastern Labrador, empowering local people to overcome the stigmas of history and finally acknowledge their Inuit ancestry.

A Companion to Global Environmental History-J. R. McNeill 2014-12-22

A Dictionary, Practical, Theoretical, and Historical, of Commerce and Commercial Navigation- John Ramsay McCulloch 1850

Dictionary of Newfoundland English-W.J.
The Dictionary of Newfoundland English, first published in 1982 to regional, national and international acclaim, is a historical dictionary that gives the pronunciations and definitions for words that the editors have called "Newfoundland English". The varieties of English spoken in Newfoundland date back four centuries, mainly to the early seventeenth century migratory English fishermen of Cornwall, Devon, Dorset and Somerset, and to the seventeenth to the nineteenth century immigrants chiefly from south-eastern Ireland. Culled from a vast reading of books, newspapers and magazines, this book is the most sustained reading ever undertaken of the written words of this province. The dictionary gives not only the meaning of words, but also presents each word with its variant spellings. Moreover, each definition is succeeded by an all-important quotation of usage which illustrates the typical context in which word is used. This well-researched, impressive work of scholarship illustrates how words and phrases have evolved and are used in everyday speech and writing in a specific geographical area. The Dictionary of Newfoundland English is one of the most important, comprehensive and thorough works dealing with Newfoundland. Its publication, a great addition to Newfoundlandia, Canadiana and lexicography, provides more than a regional lexicon. In fact, this entertaining and delightful book presents a panoramic view of the social, cultural and natural history, as well as the geography and economics, of the quintessential lifestyle of one of Canada's oldest European-settled areas. This second edition contains a Supplement offering approximately 1500 new or expanded entries, an increase of more than 30 per cent over the first edition. Besides new words, the Supplement includes modified and additional senses of old words and fresh derivations and usages.

**Newfoundland**-Joseph Hatton 1883
Fraser's Magazine - 1853

Fraser's Magazine - James Anthony Froude 1853

Cod Collapse - Jennifer Thornhill-Verma 2019-10-30
It's 1992 in Newfoundland and Labrador and the cod moratorium has put some thirty thousand fishers out of work. Journalist Jenn Thornhill Verma blends memoir and research in this gripping account of the enduring legacy of the largest mass layoff in Canadian history. Tracing the early history of the fishery to the present, Verma considers what lies ahead and what was lost along the way.

Report of the Commissioner for ... - United States Fish Commission 1887

Perspectives on Canadian Marine Fisheries Management - Canada.
Department of Fisheries and Oceans 1993
This report describes management approaches in Northern cod, lobster, Atlantic herring, Atlantic salmon, and snow crab Atlantic fisheries and the contrasting approaches to finfish and invertebrate management. The important role of the marine environment in determining resource productivity is also emphasized. Other topics covered include Arctic marine fisheries, emphasizing the Northwest Territories; the British Columbia Pacific salmon and herring fisheries; federal assistance to the Canadian fishing industry; the reliability of scientific advice on fisheries management; a discussion of the Kirby and Pearse inquiries; and aquaculture.
France alone of European countries having continued to send fishing vessels across the Atlantic down to 1880. Since then, however, the Portuguese have begun to exhibit some activity in connection with the cod fishery of the Grand Bank, and in the Spring and summer of 1885 bought several New England fishing schooners and fitted out others from home ports. Their voyages proving generally successful, they have added more vessels to their fishing fleet during the latter part of this year, and it is quite possible that, in the course of a few seasons. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. The New Werner Twentieth Century Edition of the Encyclopaedia Britannica- 1907

Harold Innis and the North-William J. Buxton 2013-06-01 Harold Innis is widely understood as the proponent of the "Laurentian school" of historiography, which mapped Canadian development along an East-West axis. Harold Innis and the North turns the axis North-South by examining Innis's intense and abiding interest in the North, and providing new perspectives on this seminal figure in Canadian political economy and communication studies. This collection reveals that Innis's advocacy of the North was closely bound up with his vision of northern Canada as the site of a second industrial revolution based on mining, hydro-electric power, pulp and paper, and enabled by new forms of transportation. Long preoccupied with Canada's coming of age as a balanced and integrated industrial nation-state, Innis grappled with the same issues about the North in the Canadian nation that we are dealing with today. Chapters explore the breadth of Innis's northern activities, including his early studies of the fur trade, his biography of eighteenth-century explorer and cartographer Peter Pond, his review essays on the North for the Canadian Historical Review, his leadership of the Rockefeller-sponsored Arctic Survey, and his trip to the Soviet Union. Harold Innis and the North crafts a new narrative about the nature and scope of Innis's intellectual project and...
provides a unique appreciation of his multi-faceted professional identity. Contributors include Sergei Arkhipov (North-Ossetian State University and NGO Vladikavkaz Institute of Economics) Jeffrey Brison (Queens), George Colpitts (Calgary), Matthew Evenden (UBC), Barry Gough (Churchill College, Cambridge and Kings College, London), Paul Heyer (Wilfrid Laurier), Jim Mochoruk (North Dakota), Liza Piper (Alberta), Shirley Roburn (Concordia), Peter van Wyck (Concordia), Jeff Webb (Memorial).

**A Fishery for Modern Times**-Miriam Wright
2001-12-15 In the early 1990s, the northern cod populations off the coast of Newfoundland had become so depleted that the federal government placed a moratorium on commercial fishing. The impact was devastating, both for Newfoundland's economy and for local fishing communities. Today, although this natural resource – exploited commercially for over 500 years – appears to be returning in diminished numbers, many fisheries scientists and fishers question whether the cod will ever return to its former abundance. In *A Fishery for Modern Times*, Miriam Wright argues that the recent troubles in the fishery can be more fully understood by examining the rise of the industrial fishery in the mid-twentieth century. The introduction of new harvesting technologies and the emergence of 'quick freezing', in the late 1930s, eventually supplanted household production by Newfoundland's fishing families. While the new technologies increased the amount of fish caught in the northwest Atlantic, Wright argues that the state played a critical role in fostering and financing the industrial frozen fish sector. Many bureaucrats and politicians, including Newfoundland's premier, Joseph Smallwood, believed that making the Newfoundland fishery
'modern', with centralization, technology, and expertise, would transform rural society, solving deep-seated economic and social problems. A Fishery for Modern Times examines the ways in which the state, ideologies of development, and political, economic, and social factors, along with political actors and fishing company owners, contributed to the expansion of the industrial fishery from the 1930s through the 1960s. While the promised prosperity never fully materialized, the continuing reliance on approaches favouring high-tech, big capital solutions put increasing pressure on cod populations in the years that followed. As Wright concludes, 'We can no longer afford to view the fisheries resources as "property" of the state and industry, to do with it as they choose. That path had led only to devastation of the resource, economic instability, and great social upheaval.'
