Organizational Behavior: Final Exam Study Set Flashcards
Organizational motives - Those who use the grapevine to enhance their power and status. Molefs prefer to divert attention away from themselves and want to be seen as more competent than others. Managers are advised to create an open, trusting environment that discourages mole behavior because moles can destroy teamwork, create conflict, and impair performance.

(PDO) Comparison of Different Management Theories
Comparing individual and organizational interests was re-emphasized by Bernard (1938) who was the first theorist to provide a modern and comprehensive view of management. He

Organisational Behaviour: Meaning, Scope, Nature, Models
Organisational Behaviour - Meaning and Definitions: According to K. Awasthiya, Stephen P. Robbins, L. M. Prasad, Nishtum and a Few Others In words of K. Awasthiya, "OB is the study of human behavior in organisational setting, of the interface between human behaviour and organisation and of the organisation itself."

Making sense of implementation theories, models and frameworks
April 21, 2015 - Theories, models and frameworks in implementation science. It was possible to identify three overarching themes of the research and frameworks in implementation science: (1) describing and guiding the process of translating research into practice, (2) understanding and/or explaining what influences implementation outcomes and (3) evaluating implementation.

Conceptual Framework for the Strategic Management: A
The objective of this work is to review the literature of the main concepts that lead to determining the strategic approach, creation of strategies, organizational structures, strategy formulation, and strategic evaluation as a guide for the organizational management, taking into account the factors produced by the different types of strategies on the performance of organizations.

Tools and Strategies for Quality Improvement and Patient
Whatever the acronym of the method (e.g., TQM, COQ) or tool used (e.g., FMEA or Six Sigma), the important component of quality improvement is a dynamic process that often employs more than one quality improvement tool. Quality improvement requires five essential elements for success: fostering and sustaining a culture of change and safety, developing and clarifying an understanding of the
