Cyberbullying and the Critical Importance of Educational Resources for Prevention and Intervention

Mariana, Gilberto, 2015-05-03 The prevention of cyberbullying is an ongoing challenge due to the multifaceted nature of cyberbullying and the difficulties in realizing effective interventions that involve educational institutions, educators, and families. Ensuring prevention programs through education need to be defined and take into account that the digital revolution changes the ways people interact and communicate. Critical interventions involving peer and sexual harassment as well as strategies that identify and prevent online harassment among middle and high school students are needed. Public institutions and schools need to develop educational curricula, and programs that prepare students to recognize and combat sexual and violence.

This Precarious Moment James L. Garlow 2018-09-04 America is at a crisis point. We have a limited amount of time to get it right. The nation must get “back on track” or be forever derailed. That is not melodrama. That is fact. Only Biblical truth can save our country. Some don’t seem to care that it is saved. But many of us do. For our children, grandchildren, and future generations. There are six serious problems — racial strife, a massive immigration disaster, failure to understand Israel’s role in the world, millennial thinking, misunderstanding of the nature of government, and a church that has capitulated to culture — that are screaming for solutions. And the good news is: there are steps we can take. In this book, Pastor James Garlow and evangelical political activist David Barton present popular Christian characteristics with six steps America needs to take to prevent chaos at this precarious moment in history.

Nude Coeds Marcus C. Hannis 2018-03-01 It was again one of those routine afternoon. The homework had been done together quickly and now they sat around, hugging. Emi, Jami, and the four girls, the upright Jule, the chaste Christina, the quiet Ann and of course Michaela, in the house of their parents where they had gathered an usual as of the generous space. The six were really good friends, really good. Michaela had last month celebrated her birthday to the age of majority and all went to see the graduation together. The silence was long and heavy. A lot of Rubbie Williams chatted out of small speakers, everyone was dwelling on their own thoughts and the sun heated up the room quite well through the windows. The summer was warm and everyone wore only causal summer dresses and the girls all wore of course heels. Suddenly, without any advance notices and without warning, Jill said: “I would like to dance completely naked. Do you know where you can dance naked? I mean, without being arrested immediately...” The silence continued for a moment, but now for another reason. Everyone was baffled, the chaste Christina even was a bit petrified. A witty smile crossed the boys’ faces. “What makes you think that’s great to be...” Ann skeptically interrupted “naked.” “...Think you’ll make people more comfortable in the abdomen.” (from Nude Coeds) You’ll find these two stories in this volume: 107 Nude Coeds A small group is bored. Four girls and two boys, just past the threshold of adulthood, meet in the afternoon to explore life. It’s about their desires to try something new, to experience new things, to feel different, to do something different, to be somebody else. Not necessarily to be the most popular, the most accepted, the most liked, the most admired. But to be something that is unique, that is different, that is not the same as everyone else. They are all young, they are all inexperienced, they are all afraid of the unknown. But they are also brave, they are also adventurous, they are also curious. They are ready to take risks, to face challenges, to be themselves. They are ready to discover, to learn, to grow. And that’s what they do. And that’s what they experience. That’s what they learn. That’s what they become. That’s what they achieve.

The Mythology of Crime and Criminal Justice Victor E. Kappeler 2017-07-18 The social construction of crime is often out of proportion to the threat posed. The media and advocacy groups shine a spotlight on some crimes and ignore others. Street crime is highlighted as putting everyone at risk of victimization, while the greater social harms from corporate malfeasance receive far less attention. Social arrangements dictate what is defined as crime and the punishments for those who engage in the prescribed behavior. Interest groups promote their agendas by appealing to public fears. Justifications often have no basis in fact, but the public accepts the exaggerations and blames the targeted offenders. The net-widening effect of more laws and more punishment catches those least able to defend themselves. This innovative alternative to traditional textbooks provides insightful observations of myths and trends in criminal justice. Fourteen chapters challenge misconceptions about specific crimes or aspects of the criminal justice system. Kappeler and Potter dissect popular images of crimes and criminals in a cogent, compelling, and engaging manner. They trace the social construction of each issue and identify the misleading statistics and fears that form the basis of myths—and the collateral damage of basing policies on mythical beliefs. The authors encourage skepticism about commonly accepted beliefs, offer readers a fresh perspective, and urge them to analyze important issues from novel vantage points.

Campus Life in the Movies-John E. Conklin 2014-01-10 Hollywood films have presented audiences with stories of campus life for nearly a century, shaping popular perceptions of our colleges and universities and the students who attend them. These depictions of campus life have even altered the attitudes of the students themselves, serving as both a mirror of a model for behavior. One can only imagine how many high school seniors enter college today with the hopes of living the proverbial Animal House or PCU Greek experience, or how many have worried over the SAT and college admissions after watching more recent movies like 2004’s The Perfect Score. This book explores themes of college life in Hill in live-action, theatrically released, feature-length films set in the United States and released from 1915 through 2006, evaluating how these movies both reflected and distorted the reality of undergraduate life. Topics include college admissions, the freshman experience, academic work, professor-student relations, student romance, fraternity and sorority life, sports, political activism, and other extracurricular activities. The book also includes a complete filmography and 66 illustrations.
