Ethnic Conflict: Stefan Wolff 2006 Why is it that Catholics and Protestants in Northern Ireland have been in perpetual conflict for the last two decades, as witnessed by the troubles and conflict in Northern Ireland? Why was there a bloody civil war in Bosnia and Herzegovina where Croats, Serbs, and Muslims had lived peacefully side-by-side for decades? Why did nobody see and act upon the early warning signs of genocide in Rwanda that eventually killed close to a million people in a matter of weeks? What is it that makes Kosovo potentially worth a nuclear war between India and Pakistan? In recent years hardly a day has gone by when ethnic conflict in some part of the world has not been in the headlines, whether in Darfur in Sudan or in the Tamil lands of Sri Lanka. This book will look at the causes of the dynamics of ethnic conflict. The book will present some of the main themes that allow us to fill this gap. Drawing on the author’s long experience of studying such conflicts around the world and his involvement in attempts to resolve them, it provides an illuminating and accessible introduction to the origins, dynamics, management and prevention of ethnic conflict. In doing so, it explains the fundamental question underlying all these conflicts: why do nationalism and ethnicity still have such terrible power to turn neighbour against neighbour?

Ethnic Conflict: Stefan Wolff 2007 Why is it that Catholics and Protestants in Northern Ireland have been in perpetual conflict for thirty years when they can live and prosper together otherwise? In recent years hardly a day has gone by when ethnic conflict in some part of the world has not made headlines. The violence involved in these conflicts continues to destabilize entire regions, hamper social and economic development, and cause unimaginable human suffering. And the extension of violence across the world is often illustrated by the fact that violence is a powerful symbol of the strong emotional and psychological impact on survivors, and so often devastating that some experts believe that ethnic conflict in particular is the most devastating force in the post-Cold War world. Although these conflicts also have political, economic, and other causes, this book has been written to fill this gap. Handbook of Ethnic Conflict Dan Landis 2012-02-14 Although group conflict is hardly new, the last decade has seen a proliferation of conflicts engaging intraetnic groups. It is estimated that two-thirds of violent conflicts being fought each year in every part of the globe including North America are ethnic conflicts. Unlike traditional wars, which are fought between states, ethnic wars are fought between nations. As the economic and psychological impact on survivors of such conflicts has been so devastating that so experts believe that ethnic conflict in particular is the most devastating force in the post-Cold War world. Although these conflicts also have political, economic, and other causes, this book has been written to fill this gap.
