**Essential Guide to Calving** - Heather Smith Thomas  
2008-01-01  
Every cattle farmer — from the keeper of a family milk cow to the rancher overseeing a large herd — will gain confidence and control by becoming more knowledgeable about calving. Healthy pregnancies, safe births, and thriving calves are critical to every cattle operation, and in remote farm locations, the veterinarian is not always readily available. Even if the vet is nearby, the farm's finances will be healthier if the farmer can oversee most of the calving process. Heather Smith Thomas, an expert on livestock with decades of firsthand experience, covers every routine situation likely to arise before, during, and after calving. And when the calving process is out of the ordinary, Thomas guides the farmer through pregnancy problems, difficult deliveries, recognizing when to call in a vet, and postpartum complications. Her thorough coverage of what to expect in every situation gives farmers the knowledge they need to care personally for their cows. The second half of the book is dedicated to ensuring that every calf gets off to a healthy start. Thomas helps farmers work with cows reluctant to nurse, substitute mothers, and frail calves. A complete chapter on calfhood illnesses explains warning signs and offers tips on prevention and treatment. As people return to farming in growing numbers, the demand for safe, humane livestock knowledge continues to increase. Farmers will turn to this reliable volume again and again as they welcome each new calf.

**The Marvelous Pigness of Pigs** - Joel Salatin 2016-05-03
From Christian libertarian farmer Joel Salatin, a clarion call to readers to honor the animals and the land, and produce food based on spiritual principles. What on earth is THE MARVELOUS PINESS OF PIGS? It's an inspiring call to action for people of faith . . . a heartfelt plea to heed the Bible's guidance . . . . It's an important and thought-provoking explanation of how by simply appreciating the marvelous pigness of pigs, we are celebrating the Glory of God. As a man of deep faith and student of the Bible, and as a respected and successful ecological family farmer, Joel Salatin knows that God created heaven and earth and meant for all living organisms to be true to their nature and their endowed holy purpose. He intended for us to respect and care for His gift of creation, not to ravage and mistreat it for our own pleasure or wealth. The example that inspires the
book's title explains what Salatin means: when huge corporate farms confine pigs in cramped and dark pens, inject them with antibiotics and feed them herbicide-saturated food simply to increase profits, they are not respecting them as a creation of God or allowing them to express even their most rudimentary uniqueness - that special role that is part of His design. Every living organism has a God-given uniqueness to its life that must be honored and respected, and too often that is not happening today. Salatin shows us the long overlooked ethics and instructions in the Bible for how to eat, how to shop, how to think about how we farm and feed the world. Through scripture and Biblical stories, he shows us why it's more vital than ever to look to the good book rather than corporate America when feeding the country and your family. Salatin makes a compelling case for Christian stewardship of the earth and how it relates to every action we take regarding our food. He also opens our eyes to a common misconception many Christians may have about environmentalism: it's not a bad thing, and definitely not just the province of secular liberals; it's really a very good thing, part of heeding God's Word. With warmth and with humor, but with no less piercing criticism of the industrial food complex, Salatin brings readers on a fascinating journey of farming, food and faith. Readers will not say grace over their plates the same way ever again.
