New to the fifth edition is a sensitivity to the cultural and bioecological nature of development. New features of the text situate children and adolescents in the contexts of their upbringing and articulate the implications of these experiences for educators and other professionals. Illustrated is the diverse nature of development and how it is influenced by social, environmental, and cultural contexts. Also new to this edition is support for teacher licensure preparation. Discover the relations among individuals, the social world, culture, and history that constitute human development. Examine the methods of dynamic, developmental research. Learn person-oriented methodological approaches to assessing development. Change the scholarship within this volume and, as well, across the four volumes of this edition, illustrate that developmental science is one of the most exciting periods of our time. Children's Literature, Briefly - Terrell A. Young 2019 A concise, engaging, practical overview of children's literature that keeps the focus on the books children read. This brief introduction to children's literature genres leaves time to actually read children's books. Written on the assumption that the focus of a children's literature course should be on the actual books that children read, the authors first wrote this book in 1996 as a "textbook for people who don't like children's literature textbooks." Today it serves as an overview to shed light on the essentials of children's literature and how to use it effectively with young readers, from PreK to 8th grade. The authors use an enjoyable, conversational style to achieve their goal of providing a practical overview of children's books that offers a framework and background information, while keeping the spotlight on the books themselves.
