U.S. History - P. Scott Corbett
2017-12-19 Published by OpenStax College, U.S.
History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Science, Empire and the European Exploration of the Pacific - Tony Ballantyne 2020-10-12 This collection of essays assesses the interrelationship between exploration, empire-building and science in the opening up of the Pacific Ocean by Europeans between the early 16th and mid-19th century. It explores both the role of various sciences in enabling European imperial projects in the region, and how the exploration of the Pacific in turn shaped emergent scientific disciplines and their claims to authority within Europe. Drawing on a range of disciplines (from the history of science to geography, imperial history to literary criticism), this volume examines the place of science in cross-cultural encounters, the history of cartography in Oceania, shifting understandings of race and cultural difference in the Pacific, and the place of ships,
books and instruments in the culture of science. It reveals the exchanges and networks that connected British, French, Spanish and Russian scientific traditions, even in the midst of imperial competition, and the ways in which findings in diverse fields, from cartography to zoology, botany to anthropology, were disseminated and crafted into an increasingly coherent image of the Pacific, its resources, peoples, and histories. This is a significant body of scholarship that offers many important insights for anthropologists and geographers, as well as for historians of science and European imperialism.

**Spanish Seaborne Empire**-John Horace Parry 2012-09-05 The Spanish empire in America was the first of the great seaborne empires of western Europe; it was for long the richest and the most formidable, the focus of envy, fear, and hatred. Its haphazard beginning dates from 1492; it was to last more than three hundred years before breaking up in the early nineteenth century in civil wars between rival generals and "liberators." Parry presents a broad picture of the conquests of Cortès and Pizarro and of the economic and social consequences in Spain of the effort to maintain control of vast holdings. He probes the complex administration of the empire, its economy, social structure, the influence of the Church, the destruction of the Indian cultures and the effect of their decline on Spanish policy. As we approach the quincentenary of Columbus's
arrival in the Americas, Parry provides the historical basis for a new consideration of the former Spanish colonies of Latin America and the transformation of pre-Columbian cultures to colonial states.

Enlightenment and Exploration in the North Pacific, 1741-1805-Cook
Inlet Historical Society 1997
Saluting an era of adventure and knowledge seeking, fifteen original essays consider the motivations of European explorers of the Pacific, the science and technology of 18th-century exploration, and the significance of Spanish, French, and British voyages. Among the topics discussed are the quest by enlightenment scientists for new species of plant and animal life, and their fascination with Native cultures; advances in shipbuilding, navigation, medicine, and diet that made extended voyages possible; and the lasting significance of the explorers’ collections, artworks, and journals.

The Ottoman Age of Exploration-Giancarlo Casale
2010-02-25 In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the lucrative trade routes of maritime Asia. The Ottoman Age of Exploration is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents.
and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem. Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean.

**A Discourse Concerning Western Planting** - Richard Hakluyt 1877

**The Travels of Marco Polo, the Venetian** - Marco Polo 1914

**Oceanic Encounters** - Margaret Jolly 2009-07-01
This volume, the result of ongoing collaborations between Australian and French anthropologists, historians and linguists, explores encounters between Pacific peoples and foreigners during the longue durée of European exploration, colonisation and settlement from the sixteenth century to the twentieth century. It deploys the concept of `encounter` rather than the more common idea of `first contact` for several reasons. Encounters with Europeans occurred in the context of extensive prior encounters and exchanges between Pacific peoples, manifest in the distribution of languages and objects and in patterns of human settlement and movement. The concept of encounter highlights the mutuality in such meetings of bodies and minds, whereby preconceptions from both sides were brought into confrontation, dialogue, mutual influence and ultimately mutual transformation. It stresses not so much prior visions of `strangers` or `others` but the contingencies in events of encounter and how senses other than vision were crucial in shaping reciprocal appraisals. But a stress on mutual meanings and interdependent agencies in such cross-cultural encounters should not occlude the tumultuous misunderstandings, political contests and extreme violence which also characterised Indigenous-European interactions over this period.

**What Was the Age of Exploration?**-Catherine Daly 2021-03-09 Land ho! Discover what the Age of Exploration was all about in this wonderful addition to the bestselling Who HQ series! Before the fifteenth century, European sailors were unsure what waited for them beyond their well-known travel routes around the Mediterranean Sea, so they kept within sight of land. But all of that
changed after Prince Henry, the Navigator of Portugal, started sending ships down the coast in the hope of finding a sea route to India and Africa. This was the beginning of a giant leap toward understanding what the globe actually looked like. Certain European nations grew rich and powerful from the New World gold and lands they claimed, while advanced, long-standing civilizations like the Aztecs and Incas were destroyed in the cruelest of ways. This book also features the fun black-and-white illustrations and engaging 16-page photo insert that readers have come love about the What Was? series!

Indigenous Intermediaries-
Shino Konishi 2015-09-29 This edited collection understands exploration as a collective effort and experience involving a variety of people in diverse kinds of relationships. It engages with the recent resurgence of interest in the history of exploration by focusing on the various indigenous intermediaries - Jacky Jacky, Bungaree, Moowattin, Tupaia, Mai, Chealthluc and lesser-known individuals - who were the guides, translators, and hosts that assisted and facilitated European travellers in exploring different parts of the world. These intermediaries are rarely the authors of exploration narratives, or the main focus within exploration archives. Nonetheless the archives of exploration contain imprints of their presence, experience and contributions. The chapters present a range of ways of reading archives to bring them to the fore. The contributors ask new questions of existing materials, suggest new interpretive approaches, and present innovative ways to enhance sources so as to generate new stories.

Exploration and Conquest - Betsy Maestro 1997-08-25
Christopher Columbus was not the first to discover the Americas, but his voyages led to European exploration of the New World. Rich in resources and natural beauty, the Americas were irresistible to gold-hungry conquistadors. The newcomers gave little thought to those who had called the lands their home, and exploration soon came to signify conquest. The New World -- and the lives of its inhabitants -- would be
changed forever.

The Politics of Dress in Somali Culture-Heather Marie Akou 2011 The universal act of dressing—shared by both men and women, young and old, rich and poor, minority and majority—has shaped human interactions, communicated hopes and fears about the future, and embodied what it means to be Somali. Heather Marie Akou mines politics and history in this rich and compelling study of Somali material culture. Akou explores the evolution of Somali folk dress, the role of the Somali government in imposing styles of dress, competing forms of Islamic dress, and changes in Somali fashion in the U.S. With the collapse of the Somali state, Somalis continue a connection with their homeland and community through what they wear every day.

Colonization and the Origins of Humanitarian Governance-Alan Lester 2014-04-17 How did those responsible for creating Britain's nineteenth-century settler empire render colonization compatible with humanitarianism? Avoiding a cynical or celebratory response, this book takes seriously the humane disposition of colonial officials, examining the relationship between humanitarian governance and empire. The story of 'humane' colonial governance connects projects of emancipation, amelioration, conciliation, protection and development in sites ranging from British Honduras through Van Diemen's Land and New South Wales, New Zealand and Canada to India. It is seen in the lives of governors like George Arthur and George Grey, whose careers saw the violent and destructive colonization of indigenous
peoples at the hands of British emigrants. The story challenges the exclusion of officials' humanitarian sensibilities from colonial history and places the settler colonies within the larger historical context of Western humanitarianism.
