ELY GREEN SURVIVES THE MOUNTAINOUS TENNESSEE—and a brewing lynch mob—for the plains of Texas and a new beginning. How about knife injuries but often withholding some of the more intimate details of the violence of the Whitechapel killings denied journalists a structure, and it is the conventions of domestic murder news. Analyzing the fourteen newspapers—two of which emanated from the East End, where the murders took place—the shows how journalists played on the fears of readers about law and order, the specter of the Whitechapel Murderer, and the general obsession with crime. The massacre, as they are wont to call it, puts on a macabre performance. PASSING THE PAST Lisa Hinrichsen 2015-06-15 Employing recent theories of memory from multiple areas of study, Passing the Past illuminates the tangled relationships among trauma, fantasy, and the public sphere, and their impact on the "South" in imagination and in reality. Focusing on the roles that narrators, both fantasy and real, play in the white popular culture of the nineteenth century, Hinrichsen brings a wealth of critical scholarship to her consideration of memory and southern literature. Hinrichsen's nuanced readings of a diverse group of southern authors, including William Faulkner, Roberto Bolaño, Zora Neale Hurston, and Carson McCullers, provide a complex portrait of the cultural, political, and social forces that have shaped both the conception and conceptualizing memory, place, and history. She unravels southern literature's critical confrontation with the region's history through complex systems of remembrance and erasure, and she traces how fantasy mediates trauma and aquilidades identity. Expansive its psychoanalytical approach, her work explores issues of law, personal desire, and the role of nostalgia, fantasy, and desire in society. The Cynic’s Word Book: A Dictionary of Jape, Hilarious, and Unusual Words for Properly Constructed Alphabet. The 1906 word book only went from A to L, however, and the remainder was never released under the compromised title. This edition of the book includes, however, a definition set attributed to his one—and-only “Demon’s Dictionary” column, including Bierce’s classic definition of A: “The first letter in every properly constructed alphabet.” Ely Green enjoys “quoting” his pseudonyms in his work. Most of the poetry, dramatic scenes and stories in this book attributed to others were self-authored and did not exist outside of this work. This includes the provincial Father Gassalacasa Jape, who has thanks in the preface—“Jape” of course having the definition: “a practical joke.” This book is a prime example of its approach: the definitions hold up well today, but some might be considered less palatable by modern readers. Regardless, the book’s humorous style is a valuable snapshot of American culture from past centuries. This book is part of the Standard Ebooks project, which produces free public domain ebooks. __ENDOFCONVERSATION__

The Myth of Race

Jefferson M. Fish, PhD 2018-02-06 The Myth of Race draws on scientific knowledge to debunk a series of myths that pass as facts, correct false assumptions, and clarify cultural misunderstandings about the highly charged topic of race. Praise for The Myth of Race comes from former U.S. Secretary of Defense William Cohen, and from anthropologist Audrey Smidley, author of Race in North America. Secretary Cohen said, “Writing with stunning clarity, Dr. Fish poses profound and perturbing questions about race...The Myth of Race is must reading.” Here are some of the myths dealt with in the book. The myth that humans are divided into Caucasoids, Negroids, and Mongoloid races. The myth that people cannot change their race. The myth of the tragic mulatto. The myth of biologically based differences in intelligence among the races. The Myth of Race demonstrates that the apparently straightforward concept of race is actually a confused mixture of two different concepts, and the confusion often leads to misunderstanding. The first concept, biological race, simply doesn’t exist in the human species. Instead, what exists is gradual variation in what people look like (e.g., skin color and facial features) and in their genes, as you travel around the planet—“with more distant populations appearing more different than closer ones. If you travel in different directions, the populations look different in different ways. The second concept, social race, is a set of cultural categories for labeling people based on how their ancestors were classified, selected aspects of what they look like, or various combinations of both. These sets of categories vary widely from one culture to another.

Killers of the Dream

Lillian Eugenia Smith 1961 Published to wide controversy, it became the source (acknowledged or unacknowledged) of much of our thinking about race relations and was for many a catalyst for the civil rights movement. It remains the most courageous, insightful, and eloquent critique of the pre-1960s South. “I began to see racism and its rituals of segregation as a symptom of a grave illness,” Smith wrote. “When people think more of their skin color than of their souls, something has happened to them.” Today, readers are rediscovering in Smith’s writings a forceful analysis of the dynamics of racism, as well as her prophetic understanding of the contradictions between racial and sexual oppression.

Five-Carat Soul

James McBride 2017-09-26 One of The New York Times’ 100 Books of 2017 “A pinball machine zinging with sharp dialogue, breathtaking plot twists and naughtily humorous McBride at his braviest and joyous best.” —New York Times Book Review From the New York Times bestselling author of The Good Lord Bird, winner of the 2013 National Book Award for Fiction, Deacon King Kong, and Kill ‘Em and Leave, a James Brown biography. The stories in Five-Carat Soul, none of them ever published before—spring from the place where identity, humanity, and history converge. They’re funny and poignant, insightful and unpredictable, imaginative and authentic—all told with McBride’s unrivaled storytelling skill and nectarous eye for character and detail. McBride explores the ways we learn from the world and the people around us. An antiques dealer discovers that a legendary toy commissioned by Civil War General Robert E. Lee now sits in the home of a black minister in Queens. Five strangers find themselves thrown together and face unexpected judgment. An American president draws inspiration from a conversation he overhears in a stable. And members of The Five-Carat Soul Bottom Bone Band recount stories from their own messy and hilarious lives. As McBride did in his National Book award-winning The Good Lord Bird and his bestselling The Color of Water, he writes with humor and insight about how we struggle to understand who we are and the world we don’t fully comprehend. The result is a surprising, perceptive, and evocative collection of stories that is also a moving exploration of our human condition.
