Implementing Change in Health Systems Michael J. Harrison 2016-01-03 Implementing Change in Health Systems brings forward thinking and evidence to the continuing debate about the nature of health care and how it is being transformed. This book examines the challenges and opportunities of technical and environmental programs and health system transformations in the US, Canada, and the Netherlands – countries that have been leaders in health system reform. The book provides a new framework for rethinking public policy implementation and system change, overcoming technical challenges, and learning. It explains the processes of implementing market reforms in very country and considers the outcomes, both expected and unanticipated. In all three countries competition reform encountered various technical, organizational, and political obstacles. Yet they triggered important changes and paved the way for significant new health policies. The complex outcomes of the reforms included changes in the quality, efficiency and cost of care, a restructuring and political control over physicians, and other health care professionals' increased adherence and conformity of community-based care. A Bibliography of ideas and practices from different management into health care. Implementing Change in Health Systems sheds new light on crucial policy issues that are currently being debated throughout Europe and North America. It is a landmark book for both students and practitioners of policy and health care professionals.
