New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today. The magazine covers everything in science and technology. It is also a platform for opinion and debate on science and society. New Scientist takes pride in being an informed, independent and opinionated magazine. It has won numerous awards for its excellence in journalism. New Scientist is owned by a charitable foundation, the Institute of Physics, which is itself the world's largest learned society in science. It is unique in that all its profits go directly to science research. New Scientist is read by a significant number of researchers and scientists around the world. It is a key source of information for those who wish to keep up with the latest developments in science.

The Right Hand to Eat

Safiya Mustafa Jariwala 2020-05

"A career can be like a snake and ladder journey, full of ups and downs, but remember, your career is a journey and not a destination." Your career does not start and end when you get a job. You start your career when you begin doing activities at school, playing sports on weekends, or working at your part-time or volunteer job. There are skills that you can develop and steps you can take each time you are faced with your next career transition. Your career will be a rich and rewarding experience that will prepare you to make many critical decisions throughout your life. So why won't you just learn and grow straight into a job that you have always wanted? Life is full of reasons! You might hate the job you don't like it, you simply want to earn more money, you may be offered the chance to do something new and challenging, or your partner is somewhere else. That's when you need to work through your career decision making process and review the career you think is the best for you. The Right Hand to Eat helps you choose your career - it doesn't choose you!
